

The `hypgtoe` package

Heiko Oberdiek

<oberdiek@uni-freiburg.de>

2007/10/30 v0.1

Abstract

Experimental package for links to embedded files.

1 Documentation

1.1 Introduction

This is a first experiment for links to embedded files. The package `hypgtoe` is named after the PDF action name `/GoToE`. Feedback is welcome, especially to the user interface.

- Currently only embedded files and named destinations are supported.
- Missing are support for destination arrays and attached files.
- Special characters aren't supported either.

In the future the package may be merged into package `hyperref`.

1.2 User interface

\href is extended to detect the prefix ‘gotoe:’. The part after the prefix is evaluated as key value list from left to right. For details, see “8.5.3 Action Types, Embedded Go-To Actions” [1].

dest: The destination name. The destination name can be set by \hypertarget in the target document. Or check the .aux file for destination names of \label commands. Also the target PDF file can be inspected, look for /Dests in the /Names entry of the catalog for named destinations. (Required.)

root: The file name of the root document. (Optional.)

parent: Go to the parent document. (No value, optional.)

embedded: Go to the embedded document. The value is the file name as it appears in /EmbeddedFiles of the current document.

The colors are controlled by hyperref’s options gotoecolor and gotoebordercolor. They can be set in \hypersetup, for example. Default is the color of file links.

1.3 Example

```
1 <*example>
2 \NeedsTeXFormat{LaTeX2e}
3 \RequirePackage{filecontents}
4 \begin{filecontents}{hypgtoe-child.tex}
5 \NeedsTeXFormat{LaTeX2e}
6 \documentclass{article}
7 \usepackage{hypgtoe}[2007/10/30]
8 \begin{document}
9 \section{This is the child document.}
10 \href{gotoe:}
11   dest={page.1},parent%
12 }{Go to first page of main document} \\
13 \href{gotoe:}
14   dest={page.2},parent%
15 }{Go to second page of main document}
16 \newpage
17 \section{This is the second page of the child document.}
18 \href{gotoe:}
19   dest={page.1},parent%
20 }{Go to first page of main document} \\
21 \href{gotoe:}
22   dest={page.2},parent%
23 }{Go to second page of main document}
24
25 \hypertarget{foobar}{}%
26 Anker foobar is here.
27 \end{document}
28 \end{filecontents}
29 \documentclass{article}
30 \usepackage{hypgtoe}[2007/10/30]
31 \usepackage{embedfile}
32 \IfFileExists{hypgtoe-child.pdf}{%
33   \embedfile{hypgtoe-child.pdf}%
34 }%
35   \typeout{}%
36   \typeout{--> Run hypgtoe-child.tex through pdflatex}%
37   \typeout{}%
38 }
39 \begin{document}
40 \section{First page of main document}
```

```

41 \href{gotoe:%
42   dest=page.1,embedded=hypgtoe-child.pdf}%
43 }{Go to first page of child document} \\
44 \href{gotoe:%
45   dest=page.2,embedded=hypgtoe-child.pdf}%
46 }{Go to second page of child document} \\
47 \href{gotoe:%
48   dest=foobar,embedded=hypgtoe-child.pdf}%
49 }{Go to foobar in child document}
50 \newpage
51 \section{Second page of main document}
52 \href{gotoe:%
53   dest=section.1,embedded=hypgtoe-child.pdf}%
54 }{Go to first section of child document} \\

56   dest=section.2,embedded=hypgtoe-child.pdf}%
57 }{Go to second section of child document} \\
58 \href{gotoe:%
59   dest=foobar,embedded=hypgtoe-child.pdf}%
60 }{Go to foobar in child document}
61 \end{document}
62 </example>

```

2 Implementation

2.1 Identification

```

63 {*package}
64 \NeedsTeXFormat{LaTeX2e}
65 \ProvidesPackage{hypgtoe}%
66 [2007/10/30 v0.1 Experimental links to embedded files (HO)]%

```

2.2 Load packages

```

67 \RequirePackage{ifpdf}[2007/09/09]
68 \ifpdf
69 \else
70   \PackageError{hypgtoe}{%
71     Other drivers than pdfTeX in PDF mode are not supported.%}
72   \MessageBreak
73   Package loading is aborted%
74 } \else
75   \expandafter\endinput
76 \fi
77 \RequirePackage{pdffescape}[2007/10/27]
78 \RequirePackage{hyperref}[2007/10/30]

```

2.3 Color support

```

79 \define@key{Hyp}{gotoebordercolor}{%
80   \HyColor@HyperrefBordercolor{\#1}%
81   \gotoebordercolor{hyperref}{gotoebordercolor}%
82 }
83 \providecommand*{\@gotoecolor}{\@filecolor}
84 \providecommand*{\@gotoebordercolor}{\@filebordercolor}

```

2.4 Extend \href

\@hyper@readexternallink

```

85 \def\@hyper@readexternallink#1#2#3#4:#5:#6:\#7{%
86   \ifx\#6\%
87     \expandafter\@hyper@linkfile file:#7\{\#3\}\{\#2\}%
88   \else
89     \ifx\#4\%
90       \expandafter\@hyper@linkfile file:#7\{\#3\}\{\#2\}%

```

```

91      \else
92          \def\@pdftempa{#4}%
93          \ifx\@pdftempa\@pdftempwordfile

186   \edef\HyGoToE@TEnd{%
187     \HyGoToE@TEnd
188   >>%
189   }%
190 }
191 </package>
```

3 Installation

3.1 Download

Package. This package is available on CTAN¹:

[CTAN:macros/latex/contrib/oberdiek/hypgtoe.dtx](http://ctan.org/tex-archive/macros/latex/contrib/oberdiek/hypgtoe.dtx) The source file.

[CTAN:macros/latex/contrib/oberdiek/hypgtoe.pdf](http://ctan.org/tex-archive/macros/latex/contrib/oberdiek/hypgtoe.pdf) Documentation.

Bundle. All the packages of the bundle ‘oberdiek’ are also available in a TDS compliant ZIP archive. There the packages are already unpacked and the documentation files are generated. The files and directories obey the TDS standard.

¹[ftp://ftp.ctan.org/tex-archive/](http://ftp.ctan.org/tex-archive/)

[CTAN:install/macros/latex/contrib/oberdiek.tds.zip](#)

TDS refers to the standard “A Directory Structure for **T_EX** Files” ([CTAN:tds/tds.pdf](#)). Directories with **texmf** in their name are usually organized this way.

3.2 Bundle installation

Unpacking. Unpack the **oberdiek.tds.zip** in the TDS tree (also known as **texmf** tree) of your choice. Example (linux):

```
unzip oberdiek.tds.zip -d ~/texmf
```

Script installation. Check the directory **TD**S**:scripts/oberdiek/** for scripts that need further installation steps. Package **attachfile2** comes with the Perl script **pdfatfi.pl** that should be installed in such a way that it can be called as **pdfatfi**. Example (linux):

```
chmod +x scripts/oberdiek/pdfatfi.pl
cp scripts/oberdiek/pdfatfi.pl /usr/local/bin/
```

3.3 Package installation

Unpacking. The **.dtx** file is a self-extracting **docstrip** archive. The files are extracted by running the **.dtx** through plain-**T_EX**:

```
tex hygptoe.dtx
```

TDS. Now the different files must be moved into the different directories in your installation TDS tree (also known as **texmf** tree):

hygptoe.sty	→ tex/latex/oberdiek/hygptoe.sty
hygptoe.pdf	→ doc/latex/oberdiek/hygptoe.pdf
hygptoe-example.tex	→ doc/latex/oberdiek/hygptoe-example.tex
hygptoe.dtx	→ source/latex/oberdiek/hygptoe.dtx

If you have a **docstrip.cfg** that configures and enables **docstrip**’s TDS installing feature, then some files can already be in the right place, see the documentation of **docstrip**.

3.4 Refresh file name databases

If your **T_EX** distribution (**teT_EX**, **mikT_EX**, ...) relies on file name databases, you must refresh these. For example, **teT_EX** users run **texhash** or **mktexlsr**.

3.5 Some details for the interested

Attached source. The PDF documentation on CTAN also includes the **.dtx** source file. It can be extracted by AcrobatReader 6 or higher. Another option is **pdftk**, e.g. unpack the file into the current directory:

```
pdftk hygptoe.pdf unpack_files output .
```

Unpacking with L^AT_EX. The **.dtx** chooses its action depending on the format:

plain-T_EX: Run **docstrip** and extract the files.

L^AT_EX: Generate the documentation.

If you insist on using L^AT_EX for **docstrip** (really, **docstrip** does not need L^AT_EX), then inform the autodetect routine about your intention:

```
latex \let\install=y\input{hygptoe.dtx}
```

Do not forget to quote the argument according to the demands of your shell.

Generating the documentation. You can use both the `.dtx` or the `.drv` to generate the documentation. The process can be configured by the configuration file `ltxdoc.cfg`. For instance, put this line into this file, if you want to have A4 as paper format:

```
\PassOptionsToClass{a4paper}{article}
```

An example follows how to generate the documentation with pdfLATEX:

```
pdflatex hypgtoe.dtx
makeindex -s gind.ist hypgtoe.idx
pdflatex hypgtoe.dtx
makeindex -s gind.ist hypgtoe.idx
pdflatex hypgtoe.dtx
```
